

Sharks

**SOME CONNECTION TO HUMANS, MAYBE
TOO MUCH CONNECTION, ACTUALLY**

- 1 How old are the biggest victims of shark attacks in Australia?
- 2 What time of the day are sharks the angriest?
- 3 What countries like to play with fire the most?
- 4 When were women the most targeted in USA between 1995-2018?

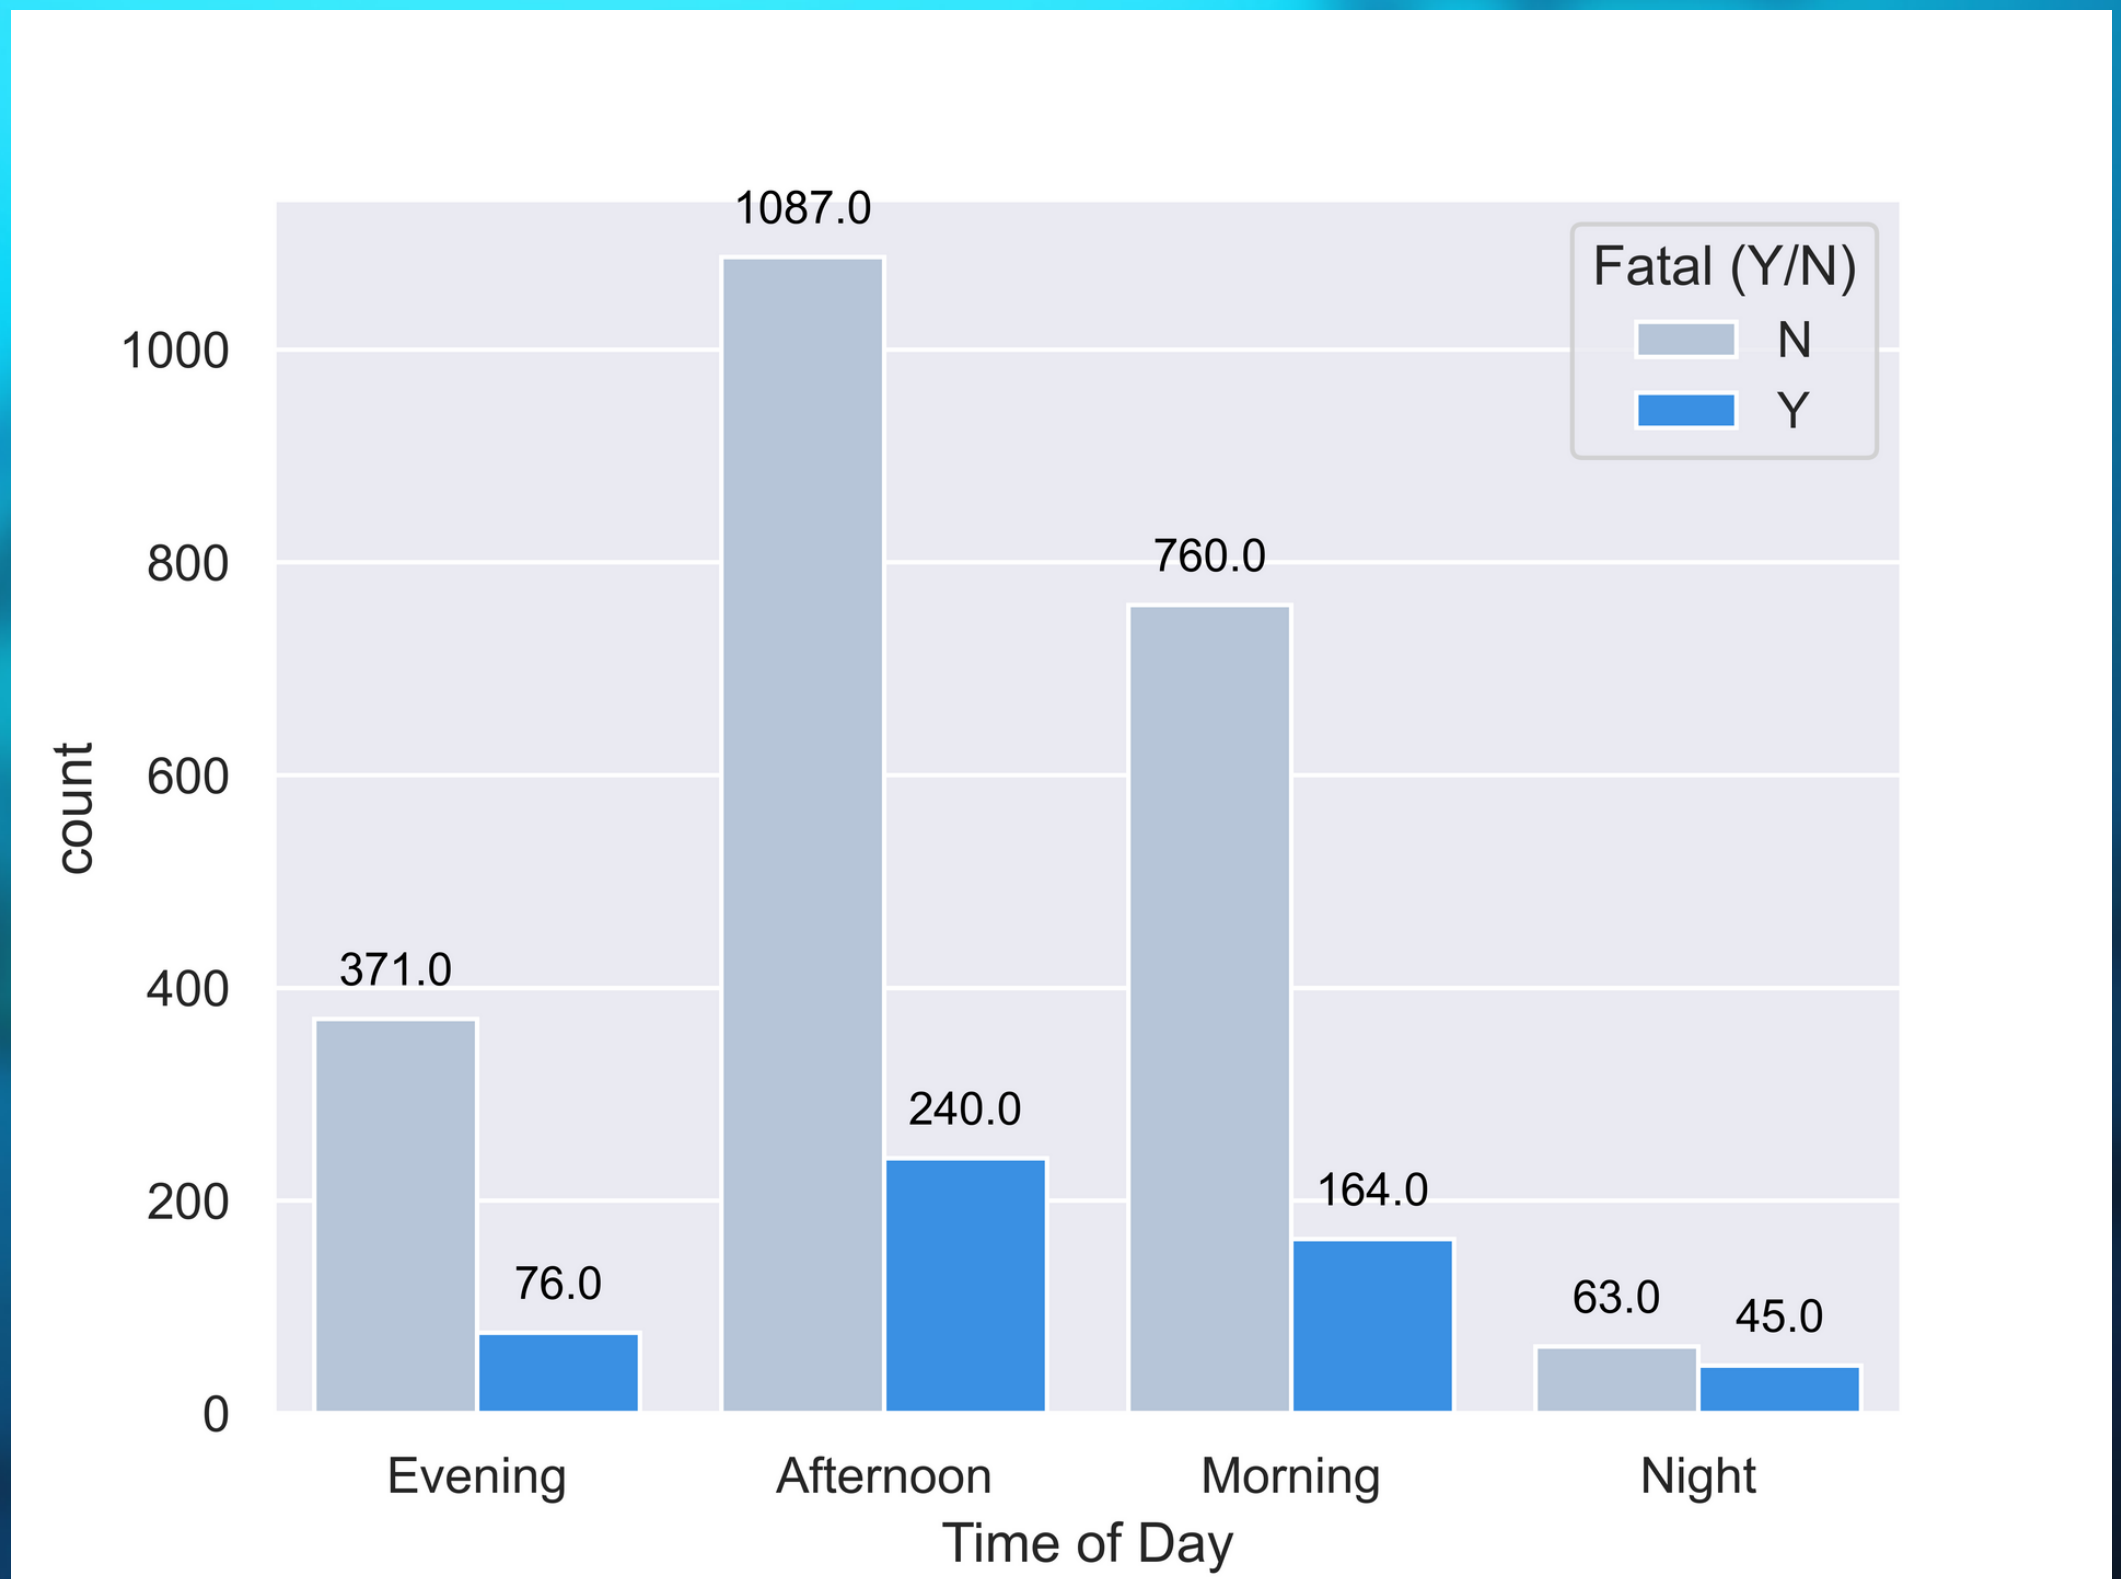

1 How old are the biggest victims of shark attacks in Australia?

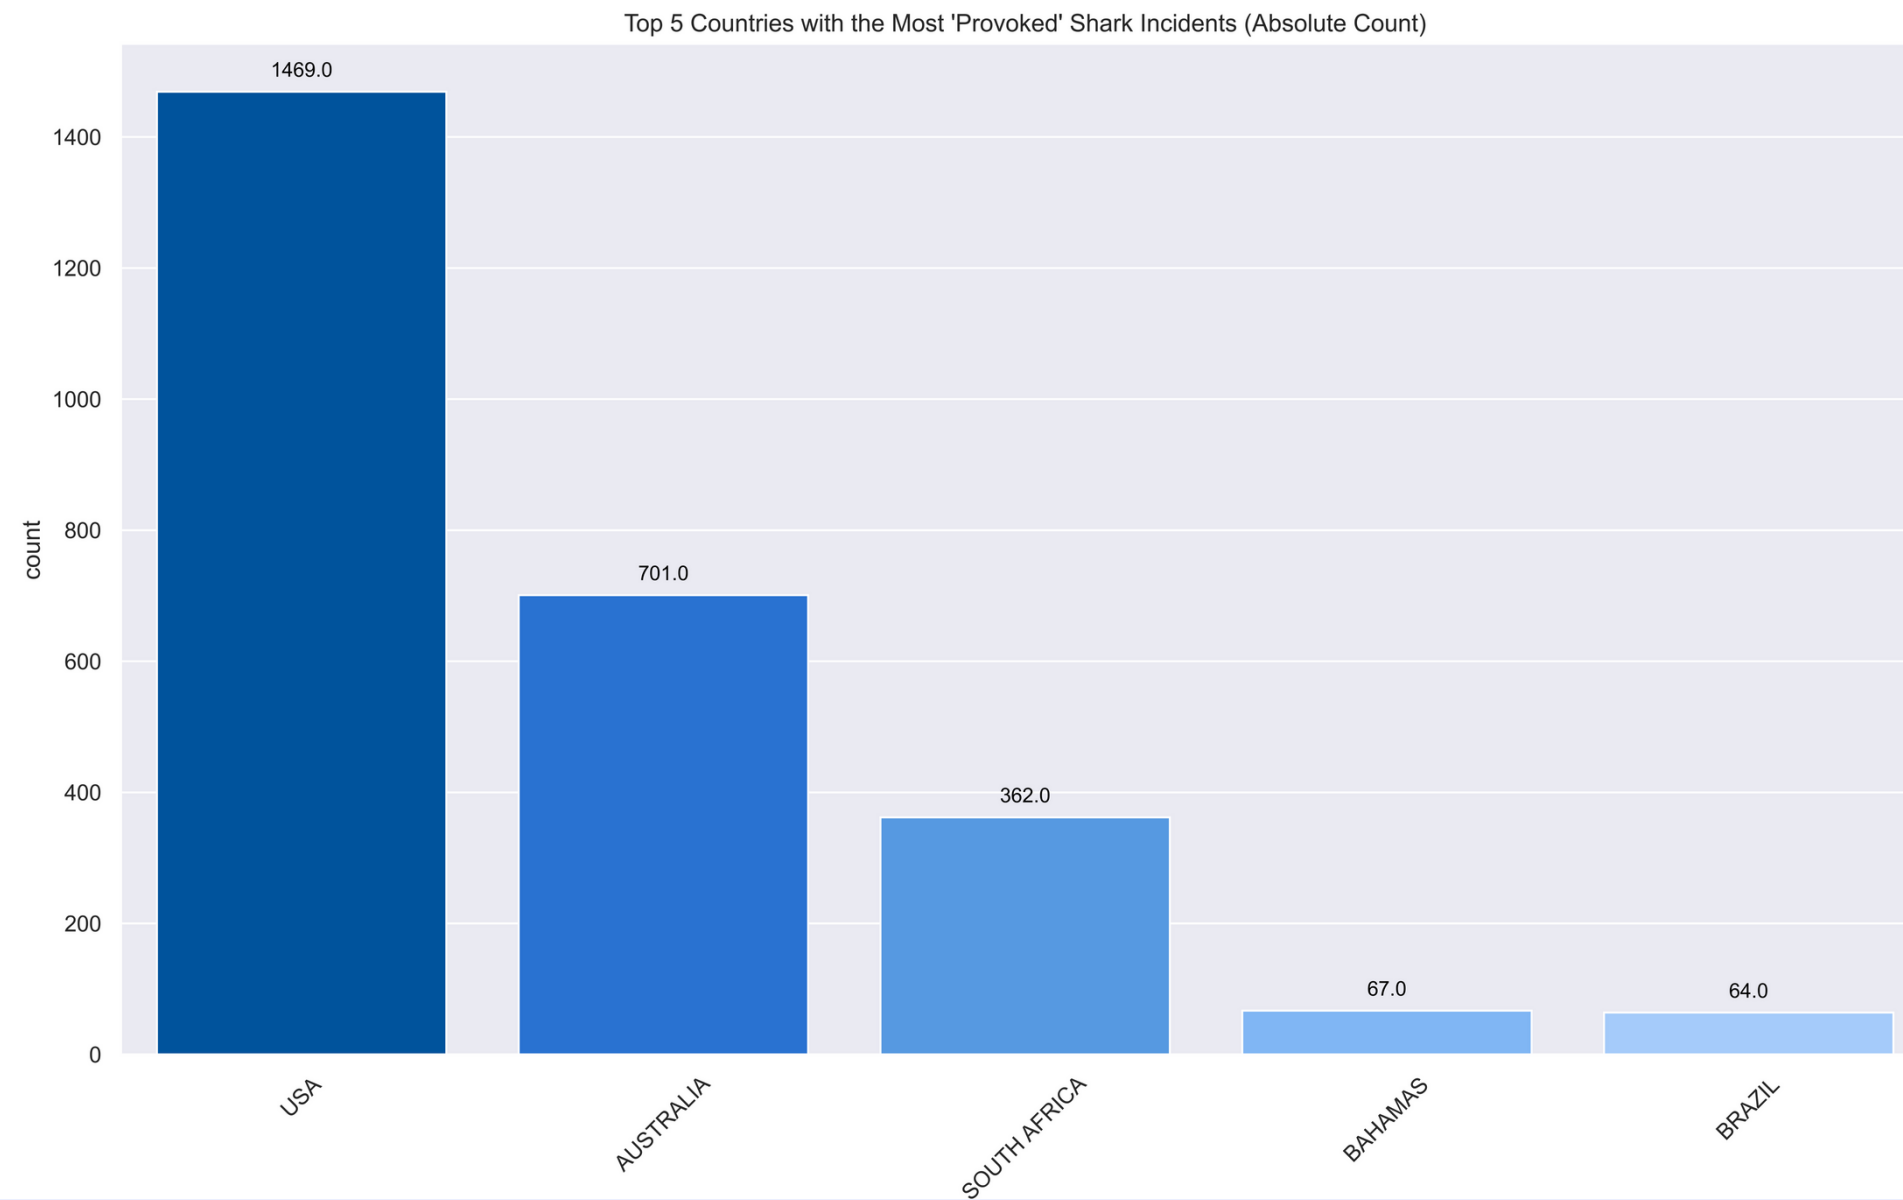

The positively skewed distribution correlates to the fact that younger people are more active in water activities.

2 What time of the day are sharks the hungriest?

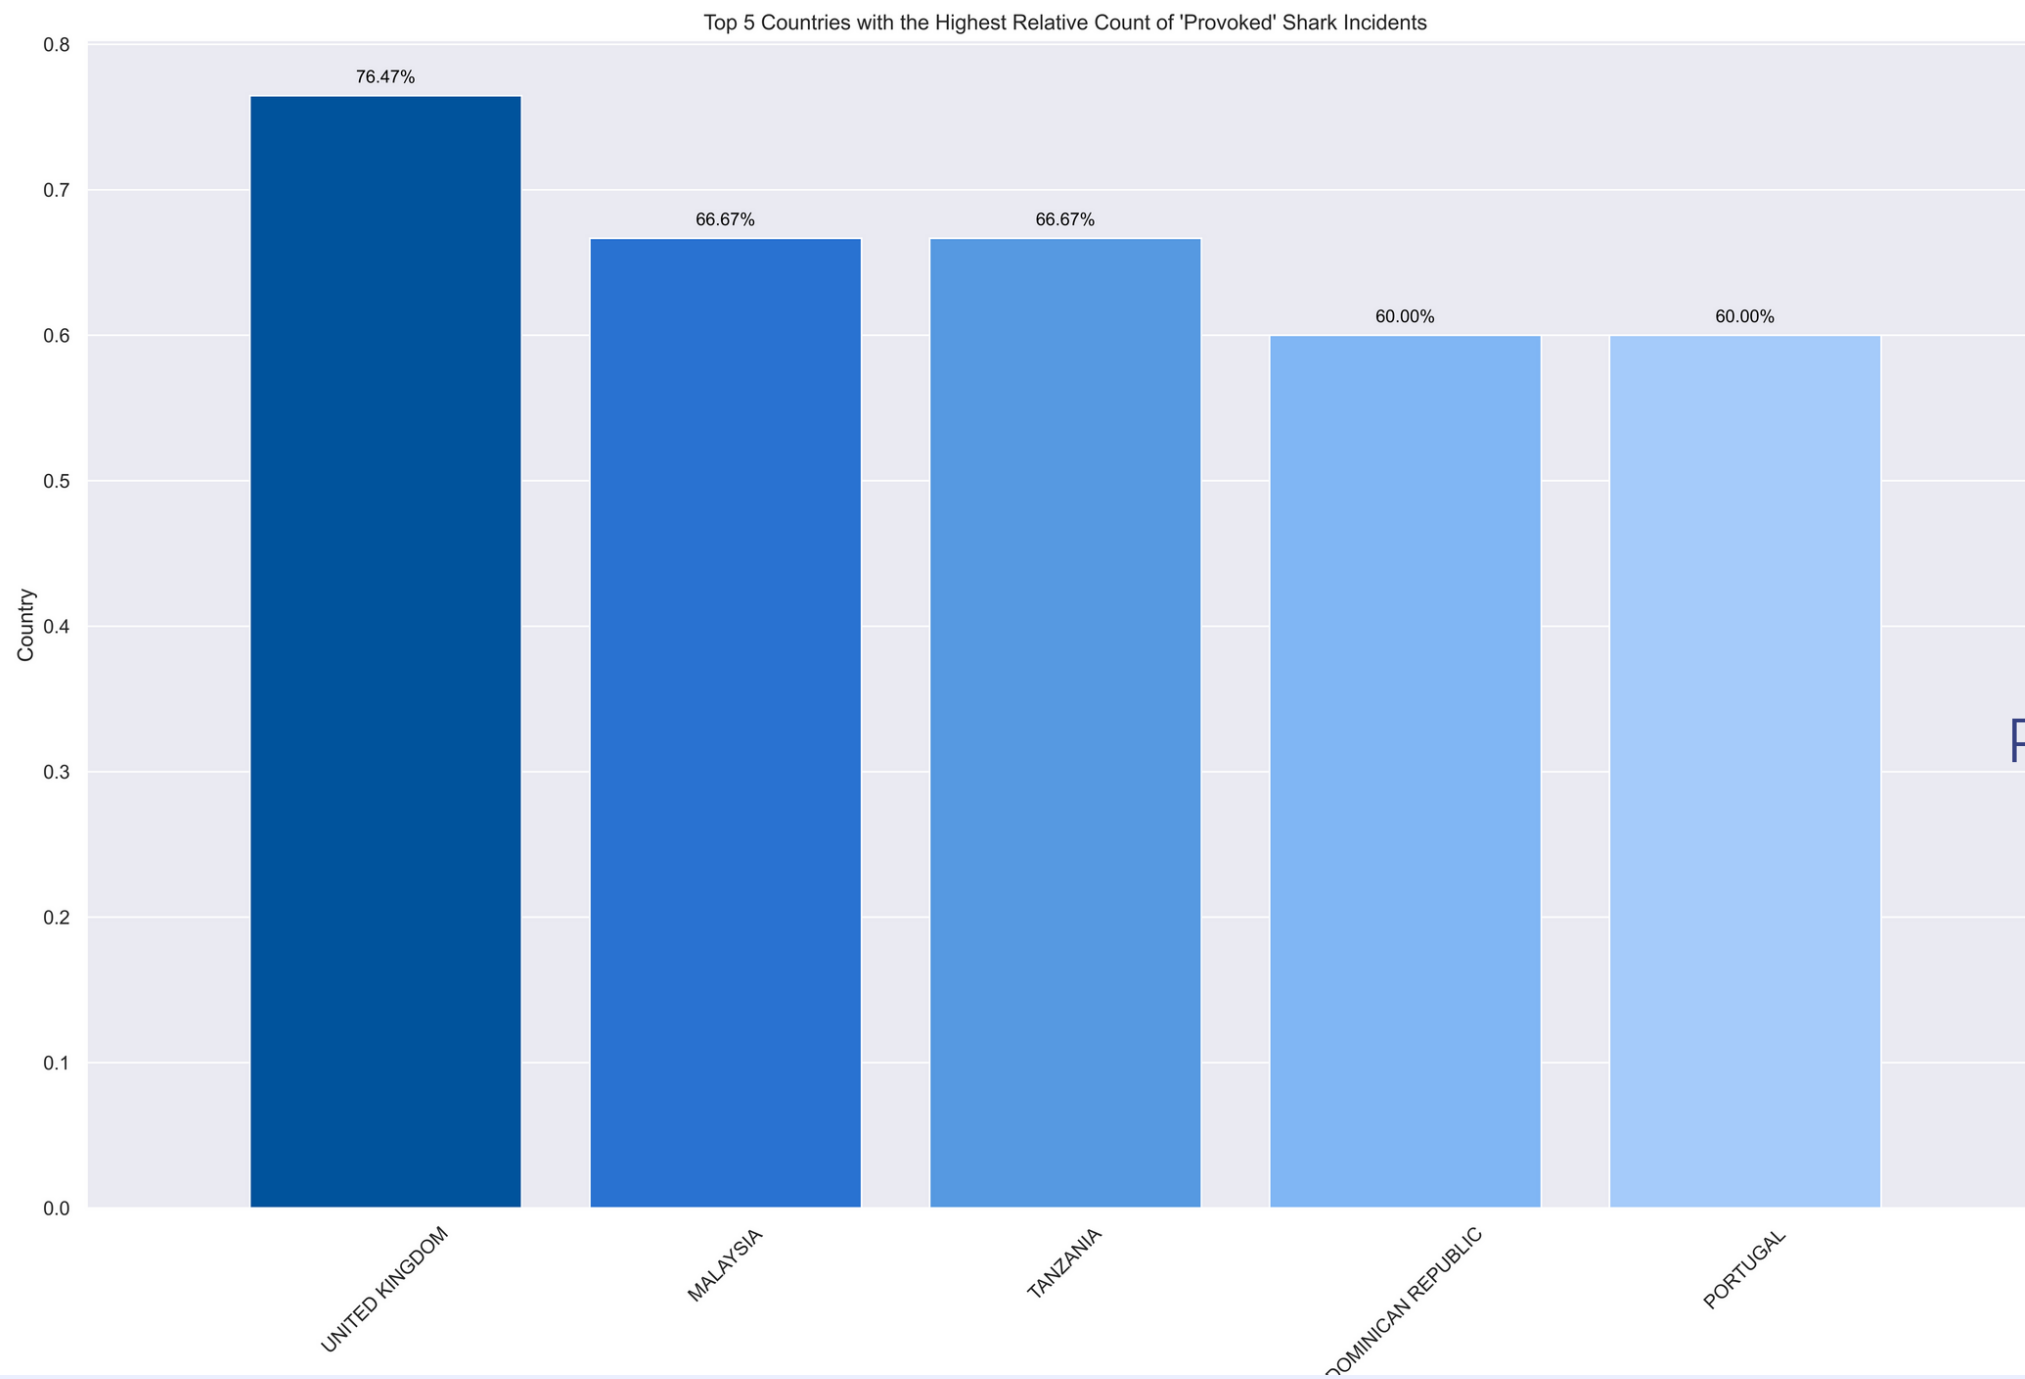

People are also more active in the water during the day (datasource missing here, this is my conclusion).

BIGGEST ABSOLUTE VALUE FOR “PROVOKED” INCIDENTS

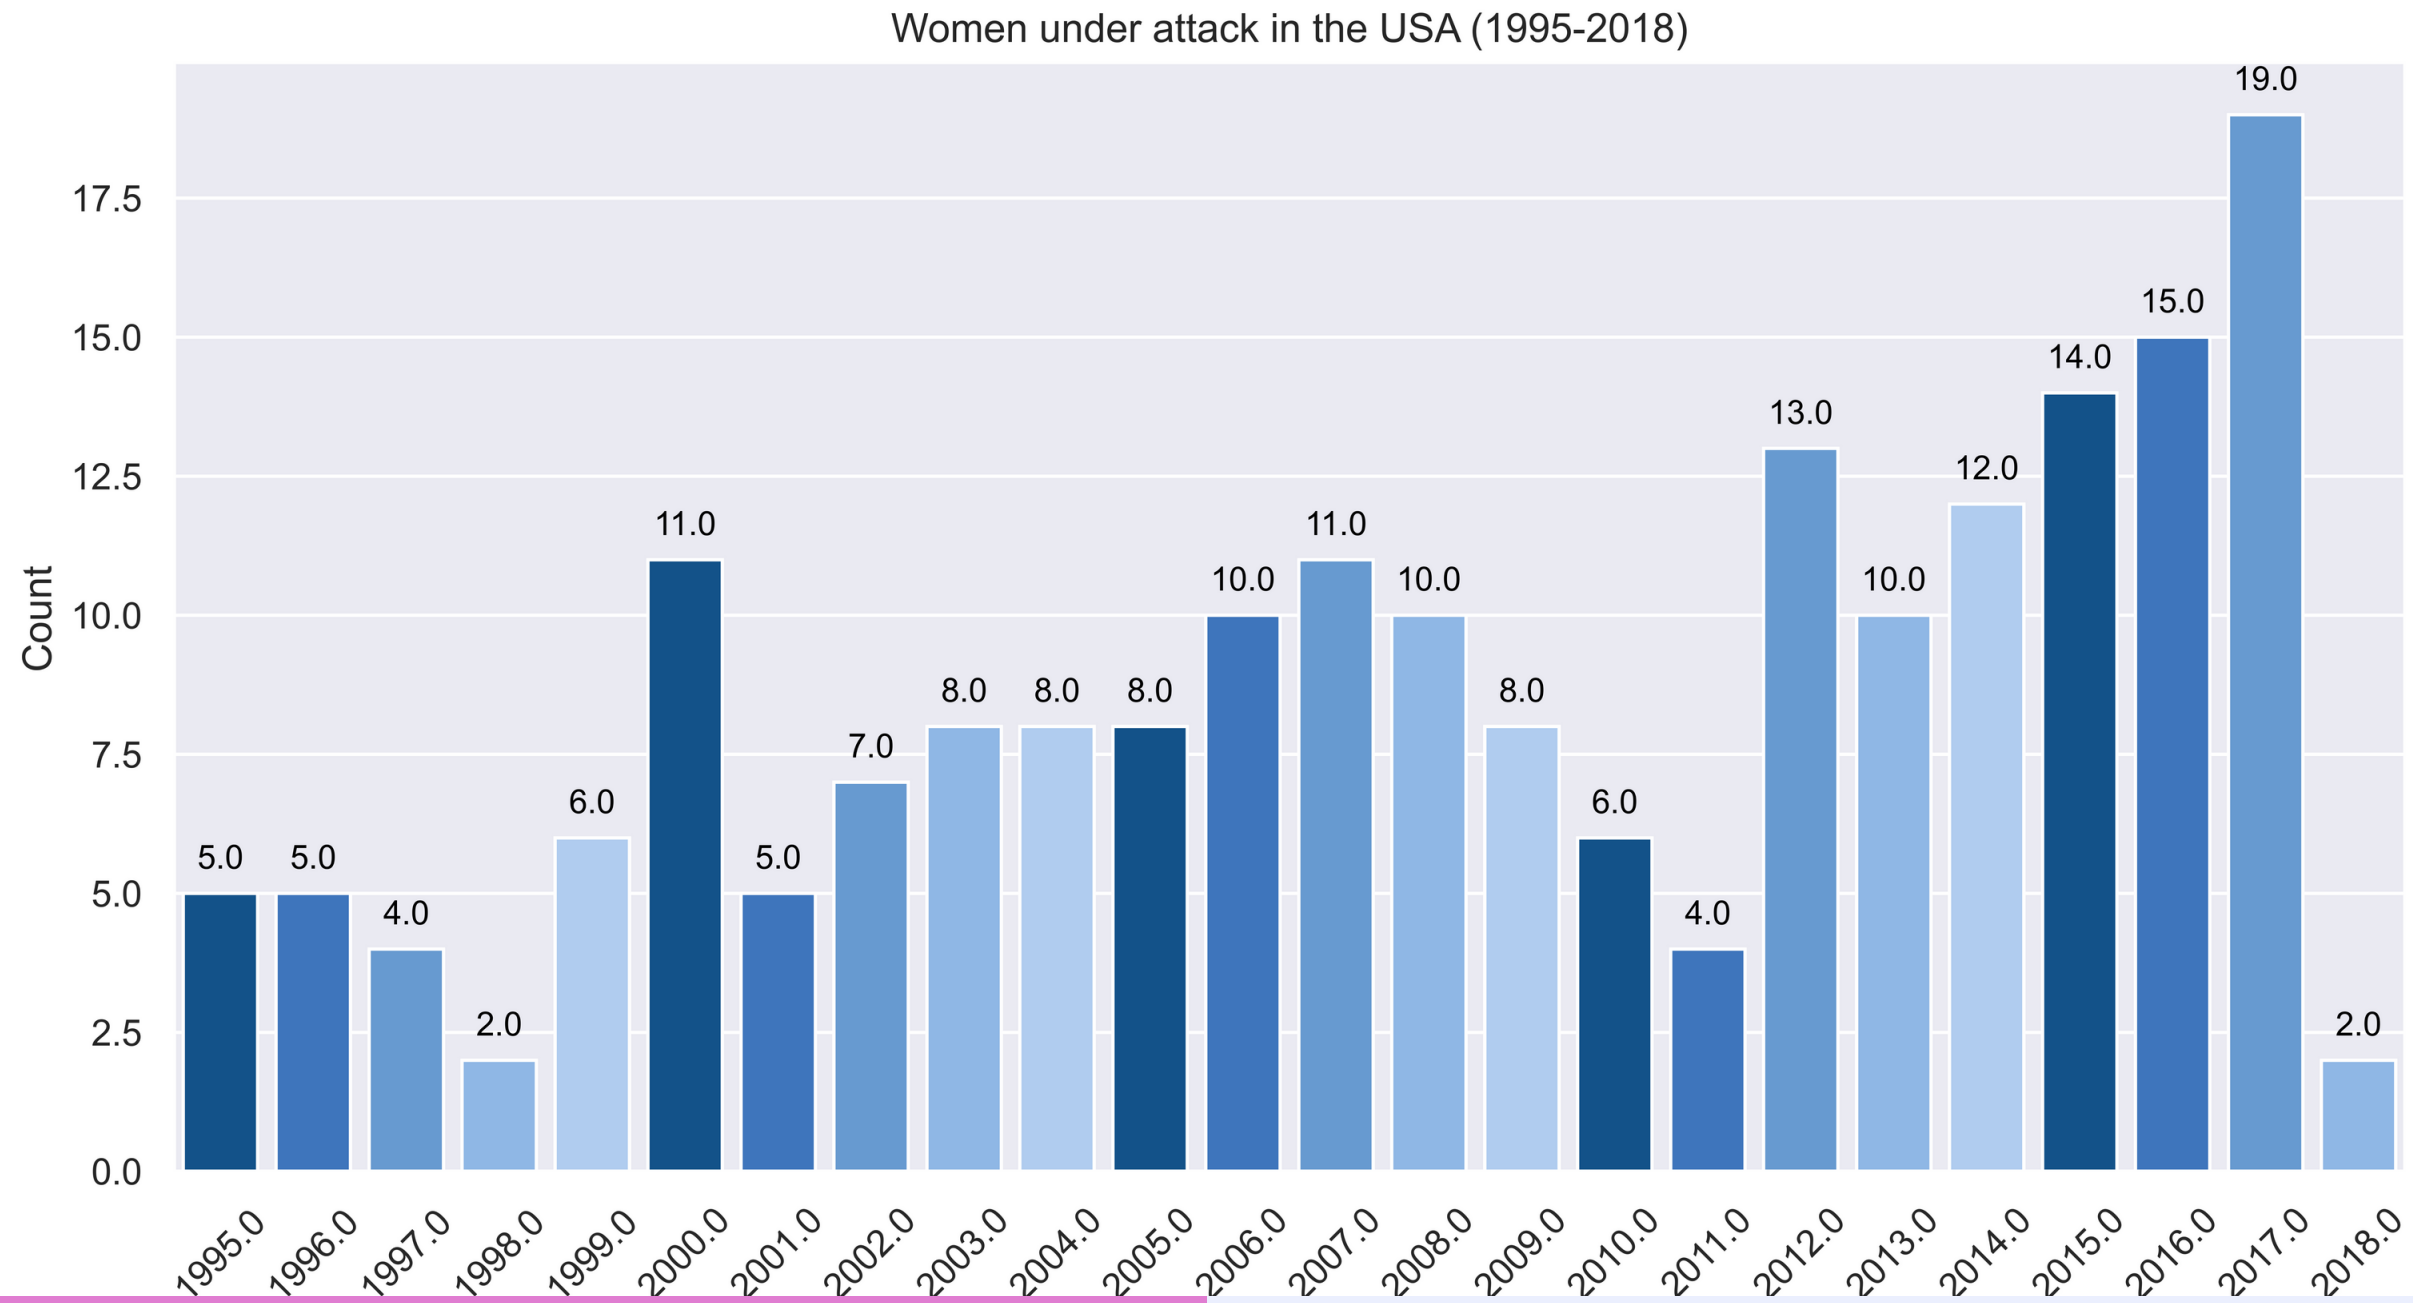

Possibly due to being very much coastal countries or maybe just because information is well documented.

BIGGEST RELATIVE VALUE FOR “PROVOKED” INCIDENTS

Relative being the division of “provoked” by the rest of
all the incidents

4 When were women the most targeted in USA between 1995-2018?

well, and men?
